OUR STORY

DTC has been providing education to Dental professionals for over 10 years, taking pride in our ability to tailor courses making them relevant to your professional journey.

Whether you are a recent graduate looking to cement the foundations of Dentistry, an experienced clinician hoping to level up, or even the seasoned pro looking to hone specific skill sets, we have the program for you.

Our specialist led courses are supplemented by GDPs to ensure our education stays relevant to modern day practice, while still being evidence-based, practically led and EduQual approved.

Come explore the courses we have to offer, and let us be a part of your journey!

SHORT COURSES

Elevate your dental career with our comprehensive 'Short Courses', designed to take your dentistry to the next level. Whether you're looking to enhance your clinical skills, expand your knowledge in specific dental specialties, or stay updated with the latest advancements in the field, our selection of short courses have got you covered.

Take the next step in your dental career journey with Dental Training Consultants. Browse our range of Short Courses and embark on a path of lifelong learning and professional growth. Your success starts here.

Becoming a 'super' Associate

Join us for our non-clinical course where you explore all non-clinical aspects of dentistry to up skill and enhance your career. We include patient communication, improving private potential ethically and discuss becoming a 'super' associate. We will also showcase the many exciting paths available to you within dentistry and how to manage your clinical practice effectively. Our team will share real-life experiences to give you insight to their dental career pathways. Whether you're just starting out or looking to advance, we'll provide valuable insights and tips to help you fast-track your dental career.

Aims:

- Growing your private potential
- Non-clinical tips and tricks for general practice
- Ethical selling
- Transitioning from NHS to Private practice
- Communication skills
- Practice owner versus Super associate
- Alternative pathways such as specialists and hospital careers

Dentures Masterclass

As the population ages, creating well-fitting, aesthetic, and functional dentures is becoming a crucial skill. Join our 3-day course to master the techniques needed for precise, aesthetic dentures on live patients. Through hands-on workshops and lectures, we'll guide you through each stage of the denture-making process, so you can create exceptional dentures in practice. Our specialist prosthodontist and experienced Lab technician will help you elevate your removable prosthetic skill to the next level.

Aims:

- The art and science of removable prosthesis
- Complete and Partial dentures
- Mastering step-by-step protocols
- Understanding the importance of lab communication
- Material selection
- Reliable retention and results
- Fee setting
- Identify errors and how to fix them
- Carry out denture stages on live patients

Veneers

This comprehensive course covers everything from patient selection and treatment planning to perfecting veneer preparation and bonding. Through hands-on workshops and case-based learning, you'll gain the skills and confidence needed to transform smiles. Elevate your practice and enhance your expertise in cosmetic dentistry with our Veneer course.

Aims:

- Case selection and patient suitability
- Literature review and longevity
- Preparation and No Preparation
- Smile design and the diagnostic mock-up
- Consent
- Preparation and design
- Temporisation
- Cementation protocols
- Laboratory communication
- Maintenance
- Fee setting

Occlusal Rehabilitation

Join us for an intensive 2-day course on Occlusion where we deep dive into the essentials of occlusion. Here you will learn how to restore balance and harmony in your patients' smiles by respecting the fundamentals of occlusion. Led by experts, this course covers occlusal concepts, diagnostic techniques, and treatment protocols in detail. Through interactive lectures, case studies, and hands-on workshops, you'll gain practical skills and the confidence to handle complex occlusal challenges with precision.

Aims:

- Occlusal terminology
- Key principles within occlusion
- Centric relation: finding it, recording and when to use it
- Conformitive versus Reorganisation
- Facebow and lucia jig
- The articulators
- Laboratory communication and the diagnostic wax-up
- Minimally invasive full-mouth rehabilitation
- Direct and Indirect full-mouth rehabilitation
- Splints
- Fee setting
